Food is available. Delivery is the missing link.

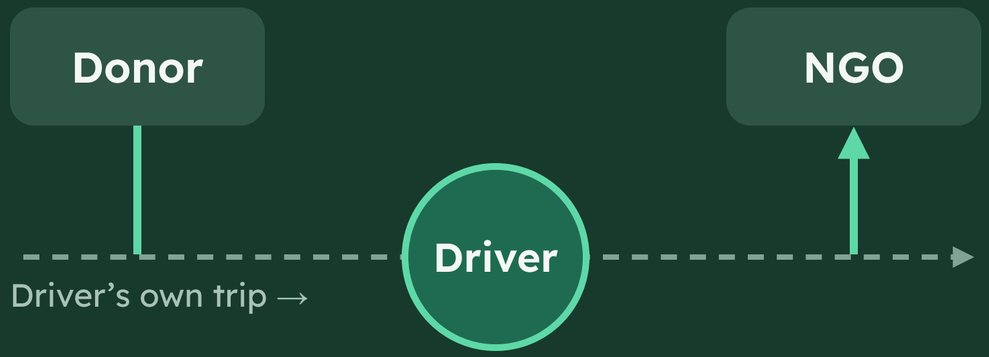

Shops throw away good food that NGOs need, because nobody is free to carry it across town.

TODAY

Booking a trip is costly and slow, so the food often expires first.

WITH RESGATA

Match donations with drivers who already pass by.

Our insight: don't create new delivery trips. Use journeys already happening.

From surplus to impact, in one platform.

1. **Donor posts surplus** — AI image analysis
   One photo: AI fills food, amount, weight and shelf life.

2. **NGO accepts the offer** — Demand-aware matching
   Matched to what each NGO asked for, scored with a reason.

3. **Driver plans a trip** — Route optimization
   Deliveries ranked by minutes added; one optimized route.

4. **Delivery verified** — Trusted handoff
   Shop’s pickup code and NGO’s delivery code close the loop.
